About Me

I am a Full-Stack Developer with hands-on experience building modern, scalable web applications using frontend and backend technologies. I specialize in JavaScript, React, Next.js, Node.js, and RESTful APIs.

In addition to development, I actively contribute to the tech community as the founder of the *Ethio Coders* Telegram channel (**@Ethio_Coders_channel** 🔗), where I support over **4.5k + developers and students** by sharing practical programming tips, learning resources, and guidance on both frontend and backend tools. I am passionate about problem-solving, knowledge sharing, and continuous learning.

Professional Experience

03/2024 – 09/2025

Orizen Technology
Full-Stack Developer
- Built and maintained web and mobile applications, working across front-end and back-end systems to deliver scalable, high-performance solutions
- Developed responsive user interfaces using modern front-end frameworks and implemented robust backend APIs and database solutions
- Collaborated with designers and backend engineers to create seamless experiences for users and optimize business processes
- Integrated third-party services, implemented authentication systems, and optimized application performance for better user experience

05/2024 – 06/2024
Everywhere

Remote Client
Frontend Developer
- Developed scalable and responsive user interfaces using **React.js**, **JavaScript**, and **Tailwind CSS**
- Translated UI/UX designs into **reusable React components** with clean, maintainable code
- Implemented smooth animations and interactive UI elements using **Framer Motion** to enhance user experience
- Integrated frontend applications with **REST APIs**, handling data fetching, state management, and error handling
- Collaborated remotely with backend developers and designers to deliver features on time
- Optimized performance, responsiveness, and **cross-browser compatibility** across devices

01/2024 – 03/2024

Habeshacode Software Company
Software Engineer
- Developed and maintained **scalable web applications** using **JavaScript, React, and Node.js**, following clean architecture and best coding practices
- Built complete **end-to-end solutions**, implementing responsive frontend interfaces and robust backend services
- Designed and integrated **RESTful APIs**, enabling seamless communication between frontend and backend systems

- Managed and optimized **MongoDB** databases to ensure data integrity, performance, and reliability
- Collaborated with cross-functional teams to analyze requirements, design system features, and deliver high-quality software on schedule
- Improved application performance, usability, and maintainability through optimization and refactoring
- Participated in **code reviews**, followed **Agile development practices**, and used **Git** for version control and team collaboration

01/2025 – 02/2025	**Efuye Gela Tech Company** Junior Full Stack Developer

- Developed and maintained **full-stack web applications** using **React, Tailwind CSS, Node.js, and Express**
- Built responsive and intuitive user interfaces with a strong focus on **usability and performance**
- Implemented backend logic, RESTful APIs, and server-side functionality to support frontend features
- Worked with **MongoDB** to design, manage, and optimize application databases
- Used **TypeScript and JavaScript** to improve code reliability, maintainability, and scalability
- Collaborated with team members using **Git** for version control and followed Agile-based workflows
- Continuously improved technical skills through **hands-on projects, remote collaboration, and self-directed learning**

06/2024 – Present	**Freelance Developer**

- Designing, developing, and delivering high-quality software solutions for a variety of clients, focusing on performance, scalability, and maintainable architecture
- Translating business requirements into effective technical implementations, building robust backend systems, optimized APIs and databases, and modern front-end interfaces
- Ensuring code quality through best practices, testing, and reviews, while introducing automation and process improvements to accelerate delivery and reliability
- Combining hands-on development with strategic planning to help clients achieve their goals through tailored, user-focused software products

Education

2022 – 2025	**Bachelor of Science in Information Systems** Addis Ababa University

Skills

Frontend
JavaScript | TypeScript | React | Next.js | HTML5 | CSS3 | Tailwind

Cloud & DevOps
AWS | Docker | Kubernetes | CI/CD | Git & GitHub

Backend
Python | FastAPI | Node.js | Express | Prisma | RESTful & GraphQL APIs | Supabase | Firebase

Methodologies & Practices
Agile/Scrum | TDD | Scalable Architecture | Clean & maintainable code

Mobile Development
Flutter | Cross-platform apps | Real-time features

Strengths
Problem-solving | Rapid prototyping | Cross-functional collaboration | User-focused solutions | Continuous learning
